INSTRUCTIONS FOR USE

First clean the area to be treated with a vacuum. Shake the can well before use.

Point the can down, then spray evenly and sparingly 40 cm from the surface to be treated.

Spread out in a thin, even layer and rub the stains with a brush or broom to properly soak the fibers.

Leave to work for about ten minutes. When drying, the foam treats deep fibers.

Brush again with a dry and clean cloth. The foam has literally absorbed the dirt which is now soaked in the cloth.

After drying fully, vacuum or brush carefully.

For colors, test on a sample before use.
